Asset Intelligence
for Mission-Critical Infrastructure

Key Features

💎 Asset Visibility
Aggregated active & passive, context-aware asset inventory

🐛 Vulnerability Management
CVE correlation & risk prioritization for offline & online assets

✅ Offline Inspection
Anti-malware, detailed asset & vulnerability scan

Key Benefits

- No installations & reboots required
- Central SBOM & asset lifecycle management
- Automated compliance reporting
- 3rd party & supply chain security
- Machine vulnerabilities audit
- Secure data transfer & hardware encryption

Securing the Pulse of Critical Infrastructure
