# Network Defense
## for Mission-Critical Infrastructure

## Key Features

### Micro Segmentation
Passive policy learning & multi-layer DPI enforcement

### Virtual Patching
CVE-mapped IPS, anti-malware & vulnerability detection

### OT Intelligence
In-depth OT protocol filtering & industrial threat intelligence

## Key Benefits

- Uninterrupted operations for OT systems
- Transparent network integration
- Fail-safe hardware bypass
- High performance, low latency
- Visibility & prevention in one solution
- Plug-and-protect deployment

Securing the Pulse of Critical Infrastructure
