

Remote Access for Mission-Critical Infrastructure

Key Features

Privileged Access

Hybrid RPAM & RBAC
for Cyber-Physical
Systems

Zero Trust

Connect verified
identities & compliant
devices to apps

Decentralized Architecture

Cloud, on-prem or air-
gapped without
exposing secrets

Key Benefits

- Infrastructure-agnostic flexibility
- Agentless secure remote access
- Secret vault & MFA for legacy apps
- Just-in-time & supervised access
- Session recording & full activity audit
- Supports any MFA, SSO, IdP setup
