

Secure Connectivity for Mission-Critical Infrastructure

Key Features

SCION Architecture

Secure and reliable
Internet with path-
aware data flows

Strategic Isolation

Max. attack surface
reduction, intrusion
and DDoS prevention

Deterministic Networking

End-to-end control
over routing, access
and performance

SCION

Key Benefits

- Next-generation, Zero Trust Internet
- Invisible critical assets & services
- Inherently secure SRA & IoT connectivity
- Uninterrupted operations
- Seamless integration
- Quick deployment without installations
